

# Device-as-a-Service

Easily adapt to the increasing demand for a digital workplace

O<sub>2</sub>  
business

The digital workplace is the 'new normal'. Colleagues need to share and collaborate wherever they happen to be. Businesses need to stay secure in a more mobile-working world. And people just want devices and tools that actually help them do their job. Adjusting to the era of the digital workplace isn't always easy. That's why we created Device-as-a-Service.

## What is it?

Device-as-a-Service ensures you get the most out of your devices:

- You can offer your people a choice of devices to suit their workstyles
- Devices are already configured to save you the time spent setting everything up
- Increase productivity as lost, stolen or broken devices are repaired and replaced within 24 hours
- All for one monthly charge per device

All of this is wrapped with a single, simplified service wrap, to reduce complexity and cost. With end-to-end in-life support management.

### Device

We offer a selection of devices that are right for your business and your people to do their job

### Device Enrolment

Our enrolment service makes it easier for your people to use their new devices the moment they get them out of the box

### Managed Logistics

Don't let a lost, stolen or broken phone affect your business with our rapid repair and replace service ensuring your teams remain productive

# Device management and productivity tools

With Device-as-a-Service, you can make digital working effortless and secure while staying in control and giving your people what they need.

We can also help with some additional services and solutions for device management and productivity tools giving your teams everything they need to get the job done, wherever they are. These include:

<b>Unified Endpoint Management:</b>	Giving you full visibility and control of all connected devices (including mobile phones, tablets and laptops), from one management portal – creating profiles for individual people to provide the same experience across all different endpoints. This includes mobile threat protection and Microsoft Intune.
<b>Data control</b>	Enabling you to decide how much and what type of data your teams can use with live detailed reporting. Making it simple to manage individual devices in real time, whilst keeping them protected from malware and phishing attacks.
<b>Mobile Voice Recording</b>	Giving you security and flexibility when capturing calls and texts made and received on any mobile device, regardless of the operating system.
<b>Microsoft 365</b>	Taking your enterprise to the next level with the leader in cloud-based productivity apps like Microsoft Teams, Word, Excel, and PowerPoint, along with intelligent cloud services and world-class security.
<b>O2 Voice for Microsoft Teams</b>	Providing telephony (PSTN) access for Microsoft Teams customers allowing you to make and receive domestic and international Enterprise grade PSTN voice calls. It supports the consolidation of voice estates onto a single platform, replacing legacy PBX or UC platforms, reducing cost and administrative overheads.
<b>Managed services</b>	We'll provide the expertise to help you get the most from your digital workplace: from business planning to solution specialists, technical architects, and network and security experts. We work with some of the best-in-class technology partners with the qualifications to prove it.

## The benefits

- You get the **latest devices** and they're refreshed at the end of your term
- Have your new devices delivered direct to your people, ready to use and set up for your business needs
- All devices come with a case and screen cover included
- You can **save as much as 26%** compared to buying new devices up-front
- You'll **reduce the burden on your IT team** with no need to set up or manage devices
- Receive a replacement phone in as little as 24 hours if it's lost, stolen or broken
- Get **peace of mind** knowing that every one of your devices is fully secure
- You'll have **full ownership** of the devices under O2's device enrolment

## Why O<sub>2</sub>

- We've been a leader in mobile-led business for more than 30 years so you'll have access to qualified experts offering a range of solutions to fit your business
- We're Gold Partners with Microsoft, have Google Accredited Experts and we were the first mobile operator to offer Samsung Knox
- We give you access to O2 Capital<sup>1</sup> offering a flexible commercial model to spread the cost of hardware and software over three years (36 instalments)
- We're with you every step of the way, from design to delivery and in-life support management

1.Assets to be insured for its full replacement value and for third party liability at all times. Terms apply.
